The author, a world champion in judo competition, demonstrates throws, holds, pins, turnovers, grabs, and entanglements, and discusses the finer points of mat work

In 1882 Jigoro Kano (1860-1938) founded Kodokan Judo at Eishoji Temple in Tokyo. It was the culmination of a lifelong devotion to the jujutsu of the past, which he reorganized while taking great care to retain its classical traditions. Historically, martial arts were practiced only by the elite in Japan. Kano, a renowned educator as well as a sportsman, is credited with popularizing the martial arts, and in particular, judo, among people in all levels of society. When he was young, Kano studied jujutsu, a martial art practiced in Japan since feudal times, which involved throwing, hitting, kicking, stabbing, slashing, choking, bending and twisting limbs-and defenses against these attacks. After years of studying, he realized that although many different jujutsu techniques were taught, there was no one core value holding them together. Kano identified an all-pervasive principle- to make the most efficient use of mental and physical energy-and combined only those techniques in which this principle was correctly applied into modern judo. "Ju" means gentleness or giving way. "Do" means principle or the way. Judo, therefore is the Way of Gentleness, which implies that first giving way leads to ultimate victory. The Kodokan is literally, "the school for studying the Way." This book is a collection of Kano's essential teachings, selected and compiled from his wealth of writings and lectures spanning a period of fifty-one years. Today the International Judo Federation has 187 member countries and regions. As an official sport of the Olympic Games, judo has inspired young people of all nationalities, and Kodokan is universally recognized as the Mecca of Judo.

Uncover the historical truth about Buddhist warrior monks with this informative and enlightening book. Film, television and popular fiction have long exploited the image of the serene Buddhist monk who is master of the deadly craft of hand-to-hand combat. While these media overly romanticize the relationship between a philosophy of non-violence and the art of fighting, When Buddhists Attack: The Curious Relationship Between Zen and the Martial Arts shows this link to be nevertheless real, even natural. Exploring the origins of Buddhism and the ethos of the Japanese samurai, university professor and martial arts practitioner Jeffrey Mann traces the close connection between the Buddhist way of compassion and the way of the warrior. This zen book serves as a basic introduction to the history, philosophy, and current practice of Zen as it relates to the Japanese martial arts. It examines the elements of Zen that have found a place in budo-the martial way-such as zazen, mushin, zanshin and fudoshin, then goes on to discuss the ethics and practice of budo as modern sport. Offering insights into how qualities integral to the true martial artist are interwoven with this ancient religious philosophy, this Buddhism book will help practitioners reconnect to an authentic spiritual discipline of the martial arts.

Verbal Judo is the martial art of the mind and mouth that can show you how to be better prepared in every verbal encounter. Listen and speak more effectively, engage people through empathy (the most powerful word in the English language), avoid the most common conversational disasters, and use proven strategies that allow you to successfully communicate your point of view and take the upper hand in most disputes. Verbal Judo offers a creative look at conflict that will help you defuse confrontations and generate cooperation from your spouse, your boss, and even your teenager. As the author says, "when you react, the event controls you. When you respond, you're in control." This new edition features a fresh new cover and a foreword demonstrating the legacy of Verbal Judo founder and author George Thompson, as well as a never-before-published final chapter presenting Thompson's "Five Universal Truths" of human interaction.

This is a book that's long overdue: One that provides information that has never before been published, compiled or analyzed in a way that's designed to help fighters. This is a guide to the science of kicking and punching that can settle the debates about which techniques are the most effective and why. It will help a fighter to fight, an instructor to teach and martial artists to advance by working things out for themselves. There is no magic involved

in the martial arts. The force and power that is displayed by an expert fighter is the consequence of rigorous training in the accurate application of physical laws. Understanding how to use these laws of physics to create massive impact forces will provide a personal insight into the practice of correct technique and form. This unique piece of work will act as a technical reference that provides the facts and figures that fighters seek, including records of the maximum force and speed achieved by some of the best present day warriors, helping to answer many of the most difficult questions in the martial arts.

This book stands apart from other staff training manuals. While most titles focus on forms and twirling, The Art and Science of Staff Fighting emphasizes the dynamics of combat. The author draws on thirty years of martial experience, presenting the best of both Eastern and Western traditions.

This is a new release of the original 1942 edition.
