Environment: The Science behind the Stories

"Environment: The Science Behind the Stories 7e is written for an introductory environmental science course for non-science majors. The "central case studies" hook students with stories at the beginning of a chapter and are threaded throughout. Related "Science Behind the Stories" boxes are integrated throughout to guide students through scientific discoveries, the ongoing pursuit of questions, and an understanding of the process of science. Unfolding stories

about real people and places make environmental science memorable to non-science majors, and engage them in the content"--

KEY BENEFIT: The first edition of *Environment: The Science behind the Stories* made the biggest splash of any new entry in environmental science over the past thirty years. The newly revised Third Edition retains all the popular features of this landmark first edition – including its integrated central case study approach, and focus on current data and critical thinking – while new instructor resources make it easier than ever to give dynamic lectures. *Foundations of Environmental Science: An Introduction to Environmental Science, Environmental Ethics and Economics: Values and Choices, Environmental Policy: Decision-Making and Problem-Solving, From Chemistry to*
